

About

Founded in 2008, BNA is a private nonprofit organization supporting parents carrying to term following a prenatal diagnosis. Having welcomed over 300 babies with various diagnoses, BNA is recognized as a subject matter expert regarding the parent experience of prenatal diagnosis and carrying to term, birth and newborn care planning for infants with a prenatal diagnosis, and the ethical care of infants with life-limiting prenatal diagnoses. As a national leader in prenatal diagnosis, BNA collaborates with Heartbeat International, the Charlotte Lozier Institute, Her Plan, the National Catholic Bioethics Center, the American Association of Prolife OBGYNs, the American College of Pediatricians, and Sidewalk Advocates for Life.

Are you looking for a proven prenatal diagnosis service?

benotafraid.net

*BNA's Parent Care Coordinator Training
is the solution.*

The BNA Model of care is:

- Research-based
- Trauma-informed
- Parent-centered

While overall abortion rates are falling, those associated with the news of a prenatal diagnosis remain high. Studies indicate that 80% of parents who receive a serious prenatal diagnosis end the pregnancy, and documented abortion rates associated with some specific diagnoses may be 90% or higher. However, most parents experiencing a prenatal diagnosis want a better option than abortion. When offered a service of comprehensive support, the majority of parents will decide to continue the pregnancy and carry to term. With BNA's Parent Care Coordinator Training, your organization can address the crisis of prenatal diagnosis with a case management support service that addresses the needs of parents receiving a variety of prognoses for their unborn babies.

BENEFITS

- Provides a life-affirming service.
- Provides a proven strategy for encouraging abortion-vulnerable parents to carry to term.
- Rooted in Catholic ethics and pastoral care.
- Valued by parents served. (100% of parents felt that BNA provided support not otherwise available to them, and 100% would recommend BNA.)
- Includes a certification option and on-going mentoring.
- Referrals generated from PrenatalDiagnosis.org

LIVE EVENTS

BNA is providing four in-person training days in 2022.
